

***Did you know MIDWEST Electrical Testing offers
INFRARED SCANNING?***

This service includes the following:

- Infrared Scan of the electrical power distribution system.
- Ultrasonic Scan of equipment operating over 600 Volts.
- Engineering analysis of the potential problems found.
- A Complete Report with the following:
 - Infrared and real life images of each problem detected.
 - An analysis and recommendation for correction of each potential problem.
 - A "Routing List" of all the areas and equipment scanned.

Some Insurance Companies require Infrared Scanning of the Electrical Equipment.
